Notes:

Flexibility: If you find your self helping out significantly with the work of a committee to which you were not assigned, but got involved with for some reason, please make a note of it in Digital Measures.

Load: Perceived workload is listed on the right. In some cases the vast majority of work falls on the chair; in others it is distributed more evenly. Some committees such as *P&T* require medium to heavy workload but have a relatively short life span. Digital measures asks for an approximate number of hours on task. I suggest not underestimating, even if the work is not very edifying. Clarification of your role and brief commentary such as “we had to deal with several minor crises” in DM is also welcome. Such clarification is particularly useful in the case of *ad-hoc* committees.

We still need a third member for the P&T committee (and P2P).
